

Veröffentlichungen Frau Dr. Sonya Faber

Effects of the proteinase inhibitor alpha2-macroglobulin on cartilage destruction in-vivo mouse model ascertained through evaluation of cytokine expression.

Gründler K, Lange

F, Birkenmeier G, Faber S, Emmrich F, Sack U, submitted

Alterations of Th1/Th2 Reactivity by Heavy Metals: Possible Consequences Include Induction of Autoimmune Diseases, Nasr Y. A. Hemdan, Frank Emmrich, Sonya Faber, Ulrich Sack, submitted

Characterization of Dendritic Cell subsets in patients undergoing renal transplantation, Wegmann C, Hoppe A, Sack U, Wötzel M, Faber S, Emmrich F, Hauss J, Fangmann J, submitted

Anti-TNF effects on destructive fibroblasts depend on mechanical stress, Lange F, Härtl St, Ungethuem U, Kuban RJ, Hammerschmidt St, Faber S, Morawietz L, Wirtz H, Emmrich F, Krenn V, Sack U., Scand J Immunol. (2006) Nov; 64(5):544-53.

Bmp7 regulates branching morphogenesis of the lacrimal gland by promoting mesenchymal proliferation and condensation, Dean C, Ito M, Makarenkova HP, Faber SC, Lang RA. Development. (2004) Sep;131(17):4155-65

Bmp signaling is required for development of primary lens fiber cells, SC Faber, M. L. Robinson, and R. A. Lang, Development (2002); 129 (15)

FGF receptor signaling plays a role in lens induction Faber SC, Makarenkova HP, Dimanlig P, Shirke S, Ko K, Lang RA, Development (2001); 128: p. 4425-4437

Veröffentlichungen Frau Dr. Sonya Faber

The upstream ectoderm enhancer in Pax6 has an important role in lens induction
Dimanlig P, Faber SC, Auerbach, W, Makarenkova HP, Lang RA, Development
(2001); 128: p. 4415-4424

Misexpression of IGF-I in the mouse lens expands the transitional zone and per-
turbs lens polarization Shirke S, Faber SC, Hallem E, Makarenkova HP, Robinson ML,
Overbeek PA, Lang RA. Mech Dev. (2001); 101(1-2): p. 167-74.

FGF 10 is an inducer and Pax-6 a competence factor for lacrimal gland develop-
ment. Makarenkova HP, Ito M, Govindarajan V, Faber SC, Sun L, McMahon G, Over-
beek PA, Lang RA, Development (2000); 127: (12): p. 2563-2572

Estrogen Promotes the Initial Migration and Inception of Ng-CAM-Dependent
Calcium-Signaling by New Neurons of the Adult Songbird Brain S. Williams, C.
Leventhal, V. Lemmon, M. Nedergaard and S.A. Goldman, Molecular and Cellular
Neuroscience (1999); 13: p.41-55

A Highly Conserved Lens Transcriptional Control Element From the Pax-6 Gene
Sonya C. Williams Curtis R. Altmann Robert L. Chow Ali Hemmati-Brivanlou and
Richard A. Lang Mechanisms of Development (1998); 73: p. 225-229

Transient Coupling and Uncoupling of Ng-CAM Expression to Ng-CAM Mediated
Calcium Signaling by New Neurons of the Adult Avian Brain. S. Goldman, S.
Williams, K. Barami, V. Lemmon, M. Nedergaard. Molecular and Cellular
Neuroscience (1996); 7: p. 29-45
